

Fix Gestures 730 (nage) and 731 (nous)

ISSUE: The gestures 730 (nage) is flip-flopped with gesture 731 (nous)

SOLUTION: (Switch the names [number] of the video clips)

For Mac or PC (Windows)

1. Quit/Exit the Database. Go-to your AIM GESTURE DATABASE folder on your hard drive.
2. Open the DATABASE_FILES folder that is inside.
3. Find the file named “730” and temporarily rename it “731new” (no quotes).
4. Now rename the clip file “731” to “730”
5. Go back to the “731new” and remove the letters “new” so that it is simply “731”
6. Re-launch the Database.

PLEASE NOTE: The Database designer/programmer apologizes for unintentionally missing this problem, especially within AIM’s high standards of quality control. It will be fixed for any version 3 of the HEA Database.
